Information Transfer

Unit - 5

What is information transfer?

Information Transfer is the most effective writing skill or technique. It is a special activity which enables person to think and imagine, by involving them in different transforming processes. The information can be systematically transferred from Verbal to Non-verbal or Non-verbal to Verbal by using paragraphs, diagrams, graphs, maps, pictures etc.

Information transfer is the process of transferring information from one person, location, or form to another. When previous knowledge or skills help or hurt your ability to learn something new, transformation of information occurs. Sometimes, this can help students learn quickly but it can also sometimes hurt the learning or slow the process.

Verbal information

Verbal information is sent or received by using word, for the purpose to exchange emotions, ideas, opinions and thoughts. Information is transferred both in written as well as oral forms.

Written Forms: Texts, Letters, Emails, SMS, Books, Magazines, Newspapers, Blogs, Articles etc.

Oral Forms: Speech, Interviews, Television, Radio, Webinars, Face to face talking etc.

Non-verbal Information

Non-verbal information is sent or received without the use of spoken forms, using the body languages like facial expressions, eye contact, gestures, appearance, nodding etc.

Body Language: Shaking hands, putting hands on shoulder, eye contact, shoulder movement, physical appearance, your closeness with others, expressions on face, hand-leg movement, artifacts, use of signs and symbols etc.

Verbal to Non-verbal Transfer

- Text to Tree Diagram
- Text to Pie Chart
- Text to Table
- Text to Map/Web
- Text to Flow Chart

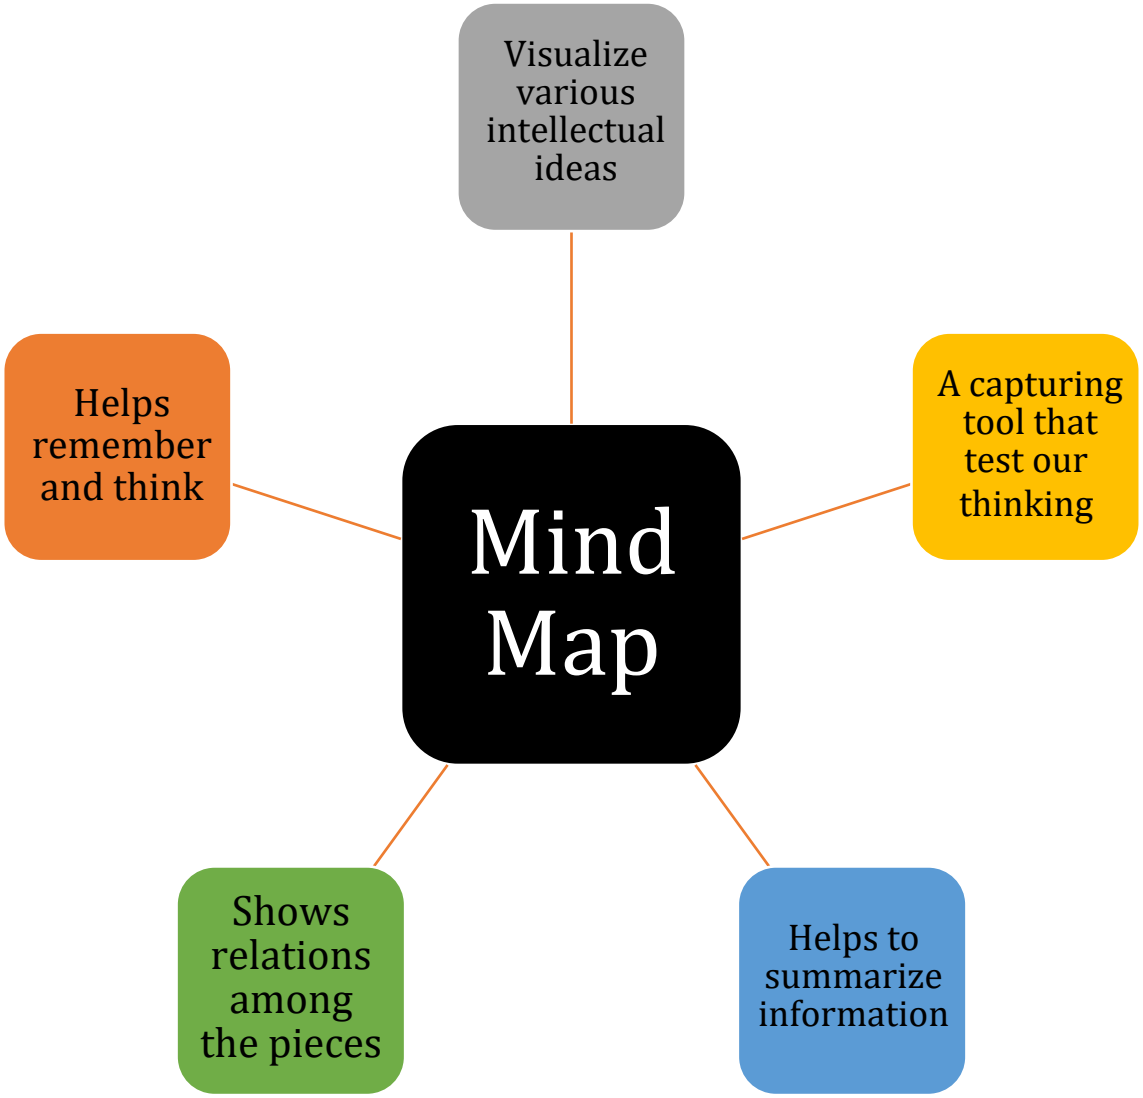
Example 1 (V-NV)

Vitamins are either fat-soluble (A,D,E,K) or water-soluble (B vitamins, including niacin, folic acid and riboflavin, and vitamin C). They consist mainly of the elements – nitrogen, oxygen, carbon and hydrogen. Fat-soluble vitamins are stored in body fat, while water-soluble vitamins are used or quickly excreted in the urine. Vitamin A is essential for the eyes, skin, hair and bones; the B vitamins help enzymes to function; C is essential for the formation of collagen; D helps the body absorb calcium; E prevents cell damage, and K helps blood clotting. Most vitamins cannot be produced by the body and so must be obtained directly from food.

Vitamins obtained from	**Food**
A/D/E/K B Vitamins	Fat-soluble **Water-soluble**
Vitamins consist of	**Nitrogen** Oxygen **Carbon** Hydrogen
Vitamins A Vitamins B Vitamins C Vitamins D Vitamins E Vitamins K	Essential for eyes & skin **Help enzymes to function** Formation of collagen **Helps body to absorb calcium** Prevents cell damage **Helps blood clotting**

Example 2 (V-NV)

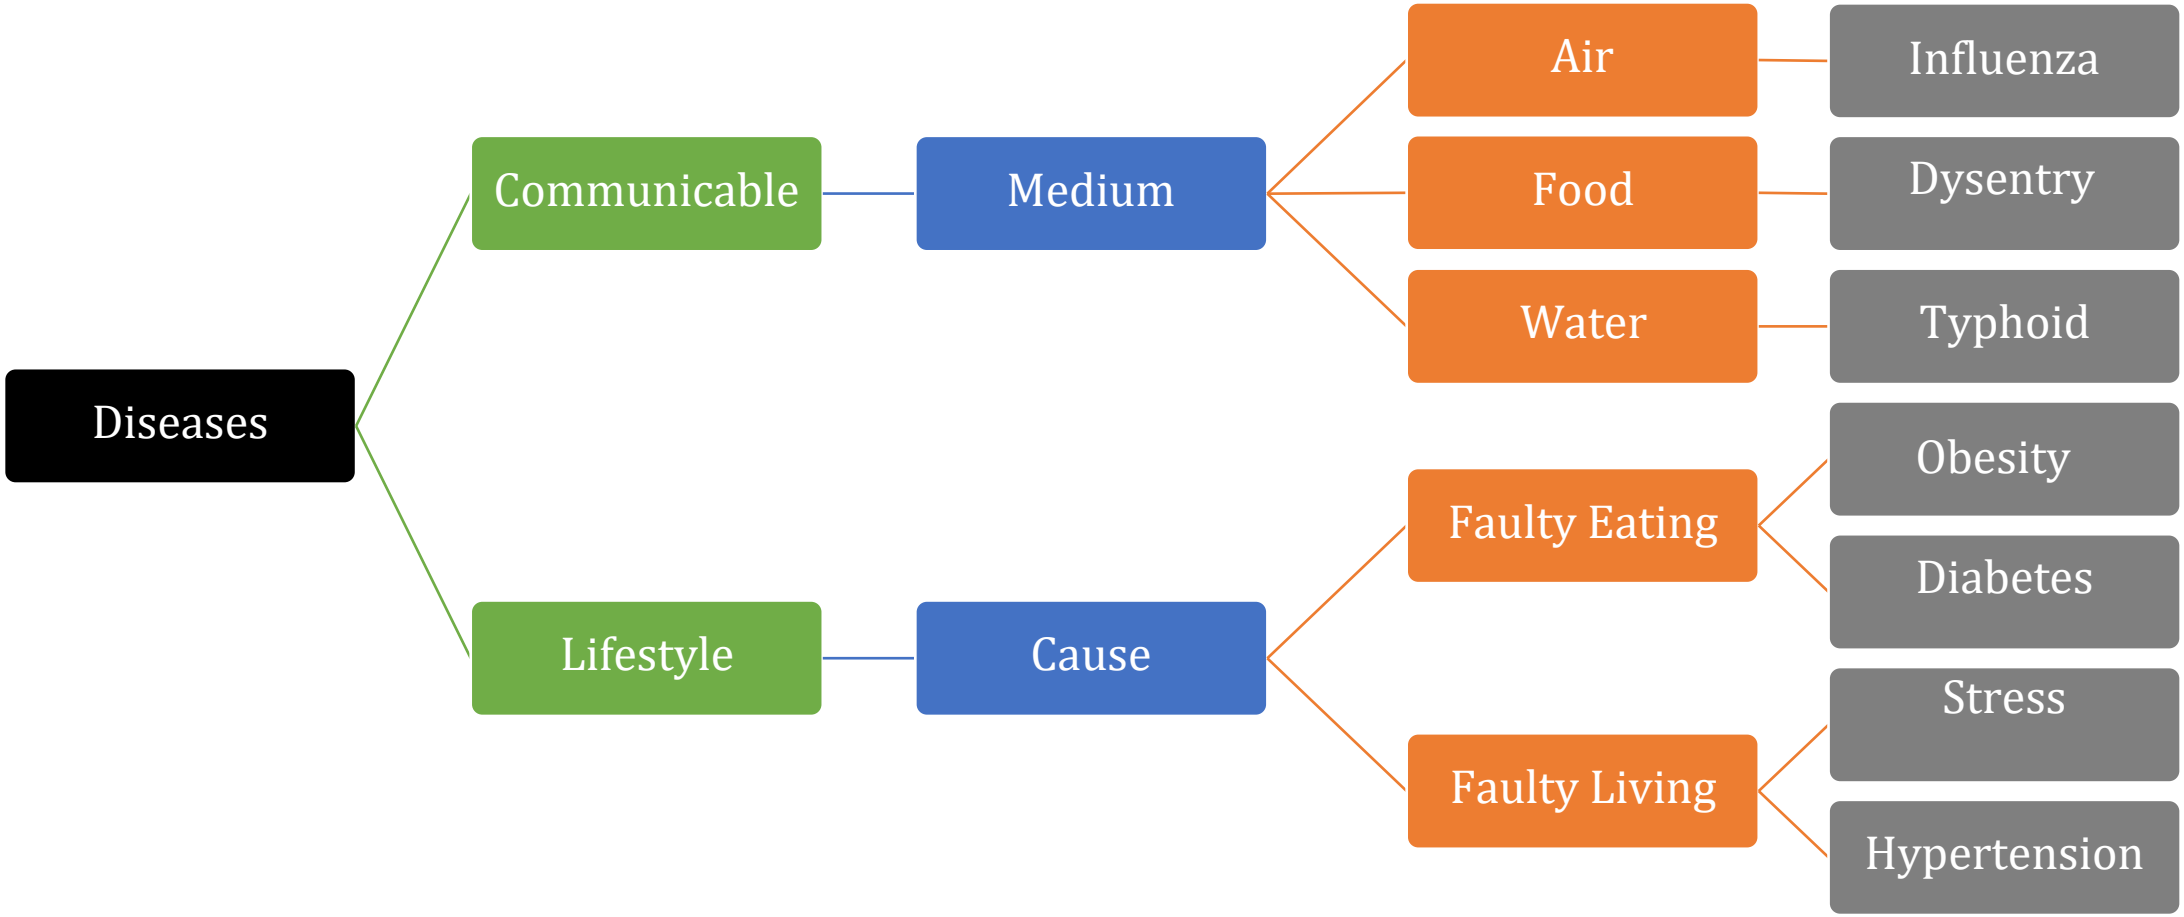
A ‘Mind-map’ is a diagram used to visualize different intellectual ideas. It shows relationships among pieces of the whole. It is often created around a single concept, drawn as an image in the center. Main ideas are connected directly to the central concept, and other ideas branch out from those major ideas. A mind map is a tool for the brain that captures the thinking that goes on inside our mind. Mind mapping helps us to think, to collect information, to remember and to create ideas. Mind-mapping really tests our thinking capability. The brain thinks by imagination, association and connection. The connections are essential for remembering and thinking. Mind maps help to summarize information in a very systematic way.

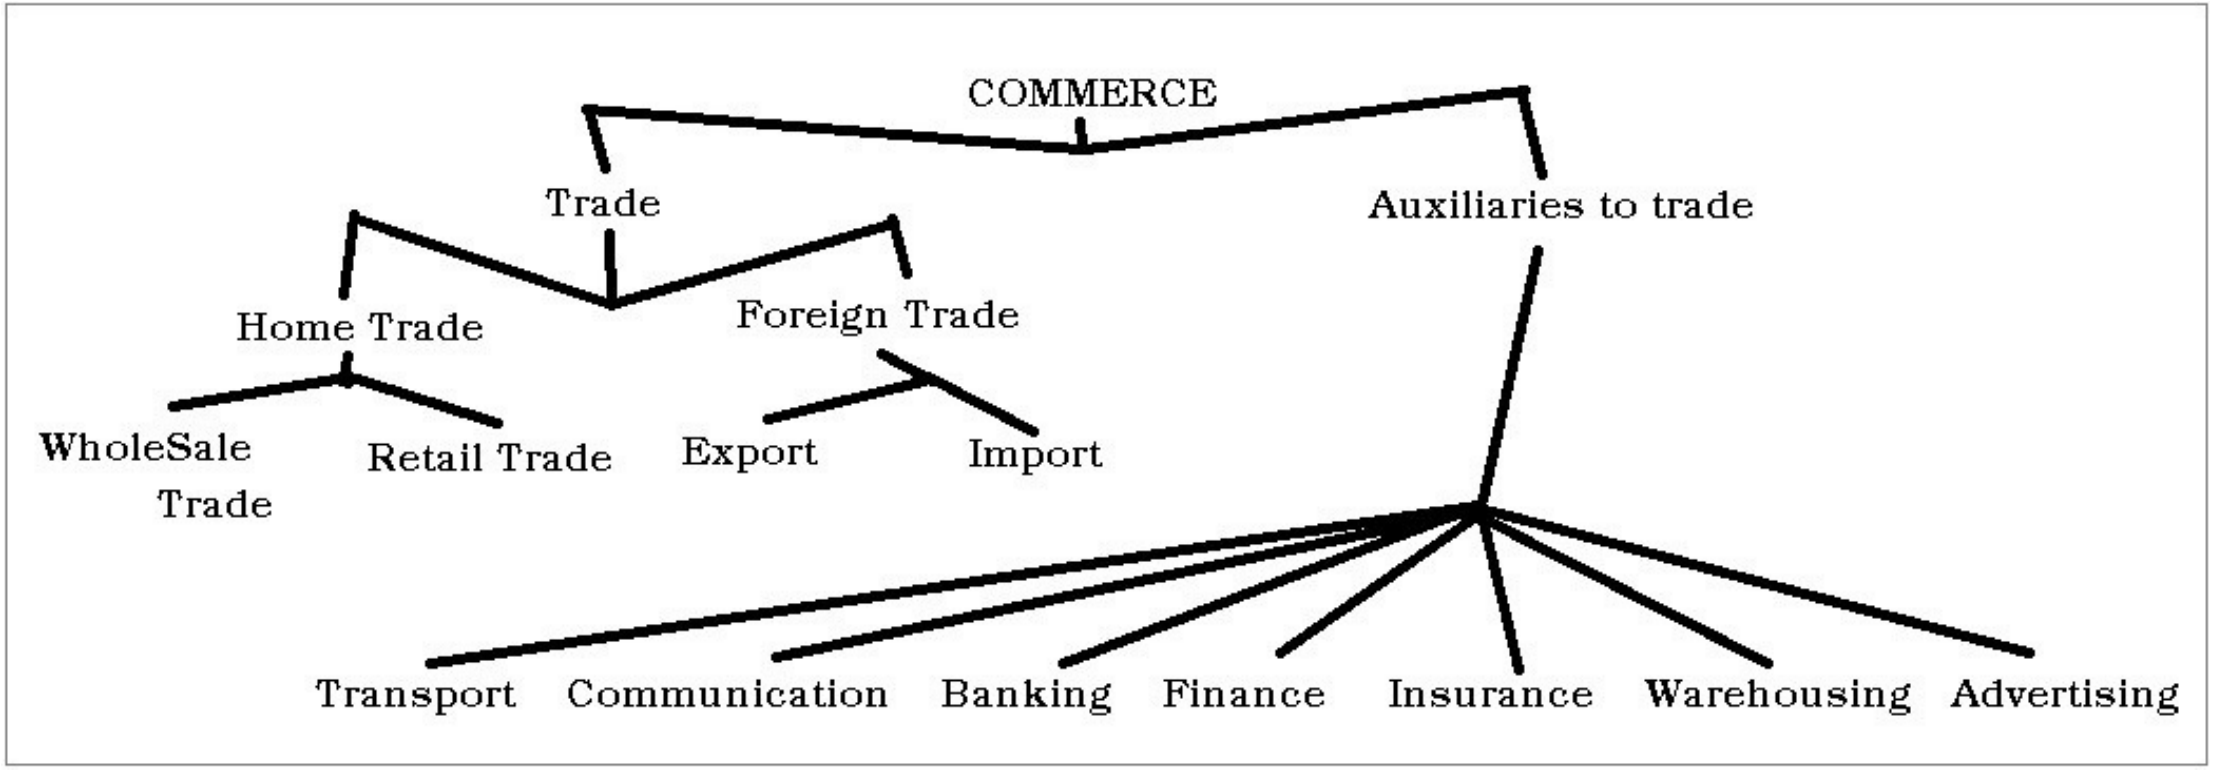


Non-verbal to Verbal Transfer

- Try to understand the points given in the tree diagram
- Write an appropriate title for your write-up
- Begin and conclude your write-up properly
- Incorporate all your points in each paragraph
- Use appropriate vocabulary and grammatical strucutres

Example 1 (NV-V)



Example 2 (NV-V)


The Tree-diagram gives information about Commerce and its types. Generally, commerce mean the trade and auxiliaries to trade. Trade is classified into two types- the home trade and foreign trade. The home trade plays an important role in national economy as the wholesale and retail trading involves a large number of people by providing them means of living. On the other hand, the foreign trade consists of import and export of goods. This type of trading consists of a few number of economic factors. Commerce cannot exist without its auxiliaries. These auxiliaries include transport, communication, banking, finance, insurance, warehousing and advertising.
